

## COVID-19 UPDATES

October 16, 2020

For live updates on COVID-19 at the state level, county level and the Claremont neighborhood, you can check our [COVID-19 Claremont Graduate University Dashboard](#).

- **Global:** Total confirmed cases: 38,599,508. Total deaths: 1,093,548. Total recoveries: 26,728,206.
- **United States:** Total confirmed cases: 7,920,386. Total deaths: 216,933. Total recoveries: 3,155,794.
- **California:** Total confirmed cases: 855,072. Total deaths: 16,639.
  - Virus transmission in Los Angeles County is rated as widespread by **the governor's reopening regime**, which places LA county in Tier 1 and keeps higher education and K-12 schools closed. Schools are permitted to open to stable groups of no more than 12 students with disabilities, students requiring instruction for English as a second language and students needing other specialized in-school services. Many businesses and services are allowed to reopen if performed outdoors with modifications. ([Los Angeles Times](#))
  - Los Angeles County is still in the strictest level of the state's four-tier economic-reopening roadmap. The county's recent testing positivity rate is low enough to qualify the county to move up to a less-restrictive tier, but the average daily number of new cases needs to drop to about 700 per day before any movement will occur. ([NBC](#))

### County-Level Statistics

**Table 1. County-level confirmed cases, deaths, and case-fatality rates.**

County	Confirmed Cases	Deaths	Case-fatality rate per 1,000	Total Population
Los Angeles	285016	6812	23.8	10,039,107
San Bernardino	58936	986	14.5	2,180,085
Orange	56283	1360	18.7	3,175,692
Ventura	13491	158	10.4	846,006
Riverside	62900	1264	18.9	2,470,546

Case-fatality rates may be biased due to undercounts in both cases and deaths

### LA County

- Total of 285016 cases across LA County, including 6812 deaths.
- For the previous 24 hours, 32 new deaths and 2266 new cases.

### Cities In Claremont's Neighborhood

Total number of cases: 12819

**Table 2. Confirmed cases in Claremont and neighboring cities**

City	Total Confirmed Cases	Total Population
Claremont	418	36,478
La Verne	528	32,206
Pomona	5822	152,361
Montclair	1384	39,437
Rancho Cucamonga	3137	177,751
Upland	1530	77,000

## Policy

- The first round of global COVID-19 vaccinations likely will go to frontline workers, health care professionals and older people. Healthy young people might not get the coronavirus vaccine until 2022, top officials from the World Health Organization said Wednesday. The United States is working toward having a vaccine for mass availability by spring 2021. ([The Hill](#))
- The Senate will vote on a limited coronavirus stimulus bill this month, Majority Leader Mitch McConnell said Tuesday, as lawmakers stumble in their push to send aid to Americans before the 2020 election. The bill will target relief to American voters, including new funding for Paycheck Protection Program small business loans. Democrats, who blocked a roughly \$500 billion Republican plan in the Senate last month, could dismiss the latest GOP proposal as inadequate. ([CNBC](#))
- Most IMF loans to help poor countries through the pandemic recommend adoption of tough austerity measures, according to an [Oxfam analysis](#). The report warns that austerity could worsen poverty and inequality and increase vulnerability to COVID-19.
- The world is experiencing a weak recovery from the COVID-19 recession. Governments have little choice but aggressive fiscal stimulus on top of already high public debt, juxtaposed against the risks of even greater and long-lasting scarring of economies in the absence of such stimulus. The global low interest rate environment will limit interest payment burdens, and, rather than crowding out private investment as in normal times, well-targeted government expenditures could serve as a catalyst for economic recovery. ([Brookings](#))
- Regeneron has applied to the FDA for emergency use authorization for its experimental monoclonal antibody therapy for treating COVID-19. The antibody therapy is a combination of two monoclonal antibodies that is designed specifically to block infectivity of SARS-CoV-2. Regeneron's experimental antibody treatment is still in large-scale clinical trials, but has been available for compassionate use, something the FDA has to approve on an individual basis, as it did for the President. ([CNN](#))

## Latest Research News

- An observational study of 60 patients in Germany found that previous infections with seasonal coronaviruses might protect against a severe course of the SARS-CoV-2 disease. It was shown that elevated antibody levels for HCoV-OC43 and HKU1 were associated with less need for intensive care therapy. ([Martin Dugas et al. medRxiv](#))
- A clinical trial that is testing an antibody treatment for COVID-19 developed by the drugmaker Eli Lilly has been paused because of a potential safety concern. Eli Lilly is one of several companies pursuing experimental treatments for Covid-19 that use

monoclonal antibodies — mass-produced mimics of immune molecules that the human body produces in reaction to the coronavirus. ([New York Times](#))

- Genomic analysis of SARS-CoV-2 in a 25-year-old Nevada man shows coronavirus re-infection with two genetically distinct viral agents. The second infection was symptomatically more severe than the first. ([Richard Tillett et al. The Lancet](#))
- The 60,000-patient clinical trial of Johnson & Johnson's COVID-19 vaccine has been paused due to an unexplained illness in a study participant. It is not yet known whether the participant received a vaccine study treatment or a placebo. ([STAT](#))
- An experimental study demonstrates SARS-CoV-2 can remain infectious on surfaces for significantly longer time than generally considered possible. A viable virus can survive on common surfaces such as glass, stainless steel and both paper and polymer banknotes for up to 28 days at 20 degrees Celsius. On some at 40 degree Celsius, however, infectious virus survived less than 24 hours. ([Shane Riddell et al. Virology Journal](#))
- South Korean drugmaker Celltrion has received regulatory approval for Phase 3 clinical trials of an experimental COVID-19 treatment. The approval comes as the company plans to seek conditional approval for its antibody drug, CT-P59, for emergency use by the end of this year. ([Reuters](#))
